

Albrecht Dürer® Artists' Watercolor Pencils

Albrecht Dürer® Artists' Watercolor Pencils are 100% water soluble, unlike any other watercolor pencil!

Product features:

- Highest quality pigments which produce bright colors with unsurpassed light fastness and permanence
- All colors are 100% water soluble
- Artist pencil with an extra-thick 3.8mm lead
- Patented, secure SV bonding process
- Environmentally friendly water-based varnish

Albrecht Dürer® Artists' Watercolor Pencils are available in 120 open stock colors and in 12, 24, 36, 60 and 120 count tins, gift sets and wooden cases.

Practical Demo Exercise #1 – Watercolor Resist

- Use a **Polychromos®** pencil and draw some vertical lines with intense color
- Shade over the lines with an **Albrecht Dürer®** pencil
- Now paint over the entire surface with a wet brush

The pigments in the watercolor pencil dissolve, but the oil based colored pencil remains permanent. The result is a luminous watercolor / mixed media effect.

Practical Demo Exercise #2

- Shade two color areas next to each other
- Use a wet brush on one area then clean the brush
- Repeat on the other side but overlap

Where the two colors blend into each other, they create a third!

Warning!

Please do not dip any watercolor pencil into a glass of water!

Why?

- Water affects the structure of the lead and softens it
- The wood will soak up water and cannot be sharpened any more
