Stretcher Bars by Richeson

SHAWN'S BASIC CROSS BRACE LAYOUT PLAN

Shawn's Basic Cross Brace Layout Plan

After starting the BEST stretcher bar production in our plant, Shawn Richeson devised this amazing basic cross brace basic layout plan that can help you plan for any size canvas.

- Use this chart as a reference when determining how many cross braces you will need
- Always divide the gaps between the cross braces equally
- To find where the center of each cross brace should be, take the total inches of the frame and divide by the number of cross braces you will be using.
