

PROJECT:  
**DOMINOES WALL HANGING**

Create a cute, inexpensive wall hanging for a game room or children's bedroom. See end of instructions for fun variations, including playable games.

*Carefully read and understand all instructions before beginning.*

**Recommended Supplies:**

- Packs of 2x4" Art Bites - item #88329
- Turner Acryl Gouache Smart Set - item #V17678
- 2H Raffine Pencil - item #68082
- Vanish Eraser - item #86469
- Foam Core Backer Board - item #79621
- Acurit Stainless Steel Ruler - item #87303
- Acurit #1 Knife - item #87301
- Creative Mark Self-Healing Cutting Mat - item #53338

- SoHo Acrylic Gloss Gel - item #87523
- Turner Acryl Gouache - White, 20ml tube (optional) - item #73671
- Beste One Stroke 1/2" Brush - item #72389
- Rhapsody Kolinsky Sable Round size 6 - item #76517

Find these items at [www.jerrysartarama.com](http://www.jerrysartarama.com)

**STEP 1:** Assemble Supplies. Decide how many Art Bites Dominoes you would like to make. Carefully take craft knife and trim the corners off all edges on top of self-healing cutting mat, to mimic the shape of real dominoes.

Drawing guidelines for domino dots

**STEP 2:** Using ruler, measure and mark centerline. Take note to draw small angles to each side (see photos) to mimic real domino faces. Use ruler to lightly draw guidelines for domino dots. If you are unsure of where dots go for different numbers, Google search domino game piece images for examples. Dots are roughly the size of a standard yellow pencil eraser and can be traced instead of freehand drawn if desired.

Drawing domino dots

**STEP 3:** Lightly erase all unnecessary pencil marks. Scribble a legend on scrap paper to assign colors to specific numbers (i.e. one dot= red; 2 dots= yellow; 3 dots=violet, etc.) so you don't accidentally paint the same dot number different colors.

Carefully paint dots on sides, and paint centerline groove dark color.

Measuring the centerline

Marking the centerline

**STEP 4:** **OPTIONAL:** Use the Turner White Acryl Gouache to whiten the dominoes, if desired. Squeeze only a small amount at a time from tube, as Acrylic Gouache is a resin base and dries hard, and cannot be reused once dry. A little goes a long way!

**STEP 6:** Lay the dominoes on your backer board, and adjust the design of them to your liking.

**STEP 7:** Once arranged, pick up your dominoes one by one and paint a thick coat of SoHo Gloss Gel on the back. Re-position back in place on the board. Check to ensure all dominoes are glued down before washing out brush with soap and water.

**STEP 8:** Once dry, place a Clearmount Zig Zag Picture Hanger on the back. Your new artwork is ready to hang!

### Fun Project Variation Ideas:

- Try different mediums on dominoes as you create them. Consider ideas like stamping, collage, etc. to mix it up!
- Create a take-along dominoes game that is lighter-weight and takes up less space than a dominoes tin. Use decorative papers to back the dominoes by coating the back of the domino with gloss gel and carefully smoothing the paper flat to adhere. Wipe off excess gel with a lightly dampened brush. Allow them to fully dry, and then carefully trim off excess paper with craft knife.
- Using the 4x8" Art Bites, make free-hanging GIANT dominoes for sticking straight onto the wall, using Zig Zag Picture Hangers on each.
- Back giant dominoes with Velcro tape and coat a large board with fabric that Velcro to stick to in order to create a playable wall game.
